Gazi Shahariar Hasan

+880 1714374806 | gssaif.tm@gmail.com | Shahariar Hasan | Shaharia66 | Portfolio

Objective

Software Engineer specializing in **full-stack development and applied AI**, with hands-on experience building production-style applications using **Java, Spring Boot, React.js, Python, and FastAPI**. Skilled in **LLM integration, RAG pipelines, vector databases, and agentic AI frameworks (LangChain, LangGraph, Crew AI)**. Comfortable across the stack: REST API design, authentication/authorization (OAuth2, JWT), relational databases (MySQL), Docker, CI/CD (GitHub Actions), and Git-based collaborative workflows. Currently applying these skills as a Junior Software Engineer (Python/AI), building on strong fundamentals in DSA and system design to deliver real-world products.

Technical Skills

Languages & Frameworks: Java, Python, JavaScript, HTML, CSS, Spring Boot, React.js, Spring Security
AI & LLM: LangChain, LangGraph, Crew AI, LlamaIndex, Hugging Face, OpenAI API, Anthropic API, RAG, Fine-Tuning, ChromaDB, Pinecone
Backend & APIs: FastAPI, REST API design, MySQL, OAuth2, JWT, CORS, Spring Boot Security
Tools & DevOps: Git, GitHub, GitHub Actions (CI/CD), Docker, System Design, DSA
Other: MS Office, Google Workspace, Canva, LaTeX | English (Proficient), Bengali (Native), Hindi (Basic)

Experience

Junior AI Engineer (Python) **Sept. 2026 – Present**
NeuraTech Ltd. Gulshan-1, Dhaka

- Design, develop, and maintain Python-based backend services and AI-driven features for production applications.
- Collaborate with cross-functional engineering teams to integrate LLM-based tools and automation pipelines into company products.
- Participate in code reviews, testing, and deployment workflows, following best practices for scalable and maintainable software.

Generative AI & Agentic AI **Dec. 2025 – Aug. 2026**
Self-Directed Study & Applied Projects

- Built AI-powered applications using LangChain, RAG, ChromaDB, and the Groq LLM API.
- Implemented semantic search over vector knowledge bases using ChromaDB, Pinecone, and RAG pipelines.
- Explored multi-agent frameworks including LangGraph, Crew AI, Agno, and AutoGen for agentic AI development.

Full Stack Web Development — Self-Directed Training & Projects **Jun. 2023 – Feb. 2025**

- Completed intensive full-stack training covering HTML, CSS, JavaScript, React, Java, Spring Boot, MySQL, Git, and GitHub, with applied project implementation.
- Implemented secure user authentication and authorization using OAuth2, including protected API endpoints and role-based access control.
- Gained end-to-end development experience from UI design through database management, API integration, and collaborative Git/GitHub workflows.

Industrial Trainee **29 Nov. 2024 – 19 Dec. 2024**
Training Institute for Chemical Industries (TICI) Palash, Narsingdi

- Operated industrial electrical systems including switchgear, safety relays, and motor protection devices; programmed and debugged PLCs.
- Conducted fault diagnosis and maintenance on process control loops, following standard safety protocols.

Projects

AI-Powered Real-Time News Aggregator **April 2026**

- Built an AI-powered news aggregation platform with React, Spring Boot, MySQL, OAuth2, and the OpenAI API to fetch, categorize, and display real-time news from trusted sources.
- Developed AI-based summarization and smart filtering, enabling users to quickly access concise insights by category, section, and date.
- Implemented secure OAuth2 authentication, bookmarking/sharing, and an admin dashboard for source management, content moderation, and analytics.

E-commerce Ordering And Payment System **March 2026**

Note: backend runs locally via Docker; happy to walk through a live demo on request.

- Built a multi-provider payment system (Stripe, bKash) using the Strategy pattern, and DFS + Redis-cached category.
- Implemented deterministic order-total and stock-reduction logic, deducting stock only after confirmed payment.
- Covered core flows with 18 automated tests and companion frontend demonstrating live Stripe checkout end-to-end.

RemoteRecruit – Features Page (Frontend Development) **Dec. 2025**

- Built a responsive React + Tailwind CSS landing page from Figma, using a reusable component architecture with scroll-triggered animations.
- Implemented WCAG AA accessibility standards including semantic HTML, keyboard navigation, focus management, verified color contrast ratios and optimised performance with lazy loading.

Multi-Provider LLM/AI Gateway **June 2026**

- Built a multi-provider AI gateway (FastAPI) unifying Groq, Mistral, Google, and Cerebras behind one API, with automatic failover on provider errors.
- Added caching and cost tracking,cutting redundant API costs to 0 and exposing usage/spend via a live dashboard.
- Containerized and deployed the full stack with Docker Compose + nginx on a self-managed Oracle Cloud VM.

Education

B.Sc (Engineering) in Electrical and Electronic Engineering **Feb. 2020 – July 2025**
Shahjalal University of Science and Technology, Sylhet CGPA 3.34 / 4.00

Higher Secondary School Certificate **July 2017 – May 2019**
Khulna Public College, Khulna GPA: 5.00 / 5.00

Secondary School Certificate **Jan. 2012 – March 2017**
Tala B Dey Govt. High School, Tala, Satkhira GPA: 5.00 / 5.00

Relevant Coursework: Digital Electronics, C Programming, VLSI, RF and Microwave Engineering, Optoelectronics, Signals and Systems, Digital Signal Processing, Electronic Devices, Web Development with AI.

Research

Undergraduate Thesis — Analytical Modeling of V_{th} in P-Channel DGJLFETs **Sept. 2024 – May 2025**
Advisors: Dr. Md. Mohsinur Rahman Adnan (BUET), Md. Shariful Islam (SUST)

- Developed a 1-D analytical model for threshold voltage in DGJLFET and DGSJLFET devices with a p-type channel, validated through TCAD simulation.

Certifications

- **Electrical & Instrumentation Training** — TICI [Certificate]
- **IEEE International Conference** — QPAIN [Certificate]
